

Manažér akvizície a správy aktív

Čím môžeš prispieť

Staráť sa, aby naša sieť nabíjacích staníc rástla a bola v dobrej kondícii. Spolu s kolegami na Slovensku a v Poľsku budeš mať na starosti akvizíciu nových lokalít pre budovanie našich nabíjacích staníc. Bude potrebné lokalitu identifikovať, dohodnúť sa s majiteľom, vybaviť potrebné povolenia a nakoniec dohliadnuť na výstavbu, ktorú zaistí náš dodávateľ. Budeš súčasťou tímu, ktorý sa o sieť aj ďalej stará, koordinuje servisných partnerov a dodávateľov, vymýšľa zlepšenia, improvizuje keď treba a robí všetko preto, aby bola naša sieť pre klientov dostupná 99% času.

Čo ponúkame

Ten najlepší tím, ktorý vie o elektromobilitate takmer všetko
Jedinečnú pracovnú atmosféru
Skvelé teambuildingy
Adekvátne ohodnotenie a odmeny za výkon
Prácu, ktorá robí svet lepším pre našu a ďalšie generácie
Základná zložka mzdy (brutto) od 2000€ a ďalšie odmeny podľa výkonu

Koho hľadáme

Kolegu so skúsenosťami v oblasti real estate alebo asset manažmentu, rozhladeného, s dobrými komunikačnými schopnosťami, ochotného veľa cestovať po Slovensku a spoznávať množstvo obchodných partnerov GreenWay. Človeka samostatného a motivovaného, ktorý si sám dokáže efektívne manažovať svoj čas. V neposlednom rade niekoho, komu sa páči, čo robíme, prečo to robíme a kam smerujeme.

Mal by mať aspoň 5 ročnú prax a dobrú znalosť angličtiny, poľština je výhodou.

Svoj životopis nám pošli na: jobs@greenwaynetwork.com

Vision

Our vision is Central & Eastern Europe cleaner, healthier, less dependent on oil thanks to the widespread use of electric vehicles.

We believe that electric cars are the future of the transport system and that they will change our cities, the way we move and raise the quality of our lives.

We foresee the emergence of a CASE ecosystem and charging infrastructure being on one side a crucial enabler of this new system on the other itself it will be significantly influenced by its specific needs.

We also envision a world where intelligent and interconnected networks of charging facilities enable integration of electric vehicles into a New Energy System based on renewables, distributed prosumers, smart grid and distributed energy storage.

Mission

GreenWay Infrastructure is devoted to make use of electric vehicles the realistic and preferred transportation option for all people.

We build and manage electric vehicle charging infrastructure throughout Central and Eastern Europe and work with people, companies, organizations, and governments to develop and expand the electromobility ecosystem.

We will make GreenWay the largest charging service provider in CEE. We are committed providing exceptional customer experience in everything what we do. Doing so, we will contribute to widespread adoption of EV in our region and fulfillment of our Vision.

3 key components creating value of the company

Below are the key components which GreenWay should maintain and develop in order to increase the value of the company, secure the basis for future growth of revenues and reach profitability. Major part of our effort should support these 3 key components.

- 1) **Being first choice charging service provider and maintaining loyal customer base** – for the EV's users GreenWay should be considered as the obvious and primary choice in selection of the charging services provider. The quality of our service and resulting exceptional user experience should make our clients to stay with us despite increasing competition.
- 2) **High quality, widespread charging network on premium locations** – represent key value proposition for our customers. Good relationship with large number of our side owner partners is instrumental for further expansion of our network and services. **Robust IT infrastructure** which manages the network is essential part of this system.
- 3) **Involved team with learning curve advantage** – the development of the company is fundamentally connected with the quality and commitment of our experienced team. Activities, goals and KPIs of the company are set to support the creation of the value of the company by supporting one or more of these 3 key components.
